SMOOTH LAUNCH FOR INFOSPHERIX IN PENNSYLVANIA'S STATE PARKS PA Official: "The Best Reservation System in the Country"

FOR IMMEDIATE RELEASE:

BELTSVILLE, MD, InfoSpherix Incorporated, a wholly owned subsidiary of Spherix Incorporated (NASDAQ/SPEX), today announced that the January launch of Pennsylvania's central reservation system was a complete success. Representatives from the state's Department of Conservation and Natural Resources (DCNR) as well as observers from other state park systems were on site as the first calls came through and the Internet reservations clicked in.

"I was impressed by the support of all areas of expertise," said Keith Taylor, Reservations and Revenue Section Chief of DCNR's Park Operations and Maintenance Division. "The staff showed a genuine interest in making the program handle whatever Pennsylvania requested and was very responsive to concerns."

InfoSpherix's ReserveWorld solution includes the state's first-ever web site to process state park camping and cabin reservations. ReserveWorld applications, technology, and people process state camping reservations, run a toll-free call center, and manage a sophisticated field system supporting all in-park sites with satellite and land-based communications. The customer-friendly central reservation system also features boat slip reservations, white-water boating permits, and a completely integrated point-of-sale (POS) system.

"The entire day went incredibly well. Campsite, cabin, and pavilion reservations were made, as well as whitewater launch time reservations and information fulfillment requests, a Pennsylvania application requirement. This had not been accomplished before for any other state," Taylor said. "You now have, in my opinion, the best reservation system in the country with top quality service."

InfoSpherix's President and CEO Richard Levin believes the key to a successful launch is developing a close working relationship with the client from the moment the contract is signed. "Our goal is always to create the kind of chemistry that maximizes the talent and energy that both sides bring to the table. That's what we were able to do with DCNR in the months leading up to the launch, and that is what's going to make the project a success in the coming years."

In addition to giving Pennsylvania's camping customers expanded ways to make reservations without the fear of double-booking, InfoSpherix's centralized, real-time reservation and POS system gives DCNR improved financial reporting and inventory management capabilities.

--OVER--

With the call center based in western Maryland, just minutes away from Pennsylvania, InfoSpherix expects to recruit a sizable number of nearby Pennsylvania residents to work on the new project. InfoSpherix will also utilize Diversified Data Systems, a Pennsylvania-based small disadvantaged business, as a subcontractor to assist in this endeavor.

InfoSpherix was awarded the 5-year contract with the Pennsylvania DCNR to operate the state's central reservation system for parks in June 2005. With 117 state parks and 3 conservation areas with facilities containing approximately 7,000 campsites and 300 cabins, Pennsylvania has one of the largest and most diverse state recreation systems in the country. The launch adds a twelfth state for which InfoSpherix manages state park camping reservations. InfoSpherix also handles reservations for the National Park Service and county park systems in California and Colorado.

InfoSpherix, a wholly owned subsidiary of Spherix, offers innovations in information technology, contact centers, knowledge management, and central reservation systems. Under its motto, "A World of Solutions," Spherix's mission is to create value and increase shareholder wealth through innovations that benefit our clients and the human condition.
